

SCHEDULE 30.2 NOTABLE TREES

Schedule 30.2 Notable Trees

Criteria for Listing¹

In order for all trees to be assessed on an equal basis and against objective criteria, the New Zealand Standard Tree Evaluation Method (STEM) has been adopted.

Three major aspects of tree character are identified, each being divided into units that can be separately valued against a hypothetical perfect score of 30 points for each unit, as follows.

- Condition evaluation:
 - Form
 - Occurrence
 - Vigour and vitality
 - Function
 - Age(years)
 - Stature (m)
- Amenity evaluation:
 - Public accessibility
 - Visibility(from 1 kilometre)
 - Proximity
 - Role
 - Climate
- Notable evaluation:
 - Stature:
 - Feature
 - Form
 - Historic:
 - Age 100+
 - Association
 - Commemoration
 - Remnant
 - Relic
 - Scientific:
 - Source
 - Rarity
 - Endangered
- The threshold for determining if trees will be classed as notable trees is a minimum of 160 points. These trees are considered to be healthy and stable and have some outstanding features that contribute to the amenity and heritage of a neighbourhood and make a positive impact on the district.
