**To:** Sandra Kelly  
**Subject:** hearings

**Importance:** High

Sandra trying to call you, but couldn't get into Hamilton this morning because of fog, flight turned back to Wellington.

Just one major point which should be made on top of all the points which will be covered by others.

Clause 10.1.2 (iii) which requires hazardous substances sites to be designed and run so that under any circumstances including any accident, the effects won't go off site, is just simply impossible and is not how sites are designed.

This has to be changed or it will effectively not allow any new hazardous substance sites.

**Regards**

**Peter**
